RE: Belt Colombia

To Whom It May Concern,

I highly recommend using Belt Colombia for any decorative metal work. They recently concluded a project for our firm that was an extremely high end and a challenging project due to the level of difficulty, schedule and amount of changes. Luis and Jhon were excellent in participating as active design team members in working with the architect and client in developing all of the designs for the railings, gates and light fixtures for this 26,000 sf home.

The level of quality delivered was excellent and they delivered the product in a very condensed time frame due to our schedule constraints. They were always willing to do what it took to help the team and worked extra hard to meet our schedule.

Their installation team also did an excellent job and worked great through some difficult conditions..

Overall they are a great member to have on your team.

Respectfully,
